This fee is in addition to basic preparation. Embalming is the process of replacing blood and bodily fluids with chemical preservatives. It is a process of sanitation, restoration and temporary preservation. Autopsy embalming and restorative practices are included in this fee. Our professional funeral directors will make a recommendation based on the condition of the body and expected service needs.

Other Care and Preparation

Requires facilities for preparation/embalming/shelter. These services are performed to provide a dignified and respectful preparation for handling the deceased prior to the identification and transfer to the final disposition. These services would be performed in most situations following a death. They would include but not be limited to when there is a request for dressing the deceased, communicable illness may be involved, trauma or an autopsy has occurred, or removal of pacemaker or radioactive implant before cremation is required.
